*Frank was a very great person him and my husband always made fun of each other they were like best friends like brothers chico misses him dearly it's hard to see this and especially his obituary because he had two sons and a daughter and he adored them like the last year I've seen him and his daughter together a lot and his son for them to be left out of this that's not fair at all and not only that he has a brother too so why was Mom the only one listed and he didn't even get along with his dad*

*He was a husband and a father of three children. His mother and him were not close and he would tell his friends stories about his mother! He was homeless countless times and his mother did not offer assistance until the end of his life was near. I've known Frank for over 25 years and he and I were friends. I gave him odd jobs, offered him a place to live and countless other blessings. My mother introduced him to my life and we (my mother and I) did many things for this man including being his friend. He would ask me what nursing home was the worst one here in Amarillo so when it was time he could his mother in it! She was not kind to her son and she wrote this obituary without including his children, brother, his deceased wife and his countless friends is heartless, selfish and self centered which is exactly what he always said she was like!!*
